

ABSTRACT

An index is modified by either adding or removing a fleet device. A modification action is discovered for the index. A fleet device is discovered for modification in the index. The modification action is implemented in the index.

- 5    The modification action is either removal of the fleet device from the index or addition of the fleet device to the index. Removal of the fleet device, capturing final usage data for the fleet device and identifying the fleet device as removed. Addition of the fleet device includes verifying the fleet device has a unique identifier, creating a record for the fleet device in the index, and collecting initial usage data for the fleet device.
